# ROBBER FOILED IN ATTEMPT TO ROB S. P. TRAIN

## Official Washington Shut Off From World by Snow Storm

### SNOWFALL AVERAGES TWO FEET; TRAFFIC BADLY DEMORALIZED

(By Associated Press) WASHINGTON, D. C., Jan. 28.—Washington today was cut off from the outside world, so far as transportation is concerned, by one of the heaviest snowstorms in the history of the capital. Officials at the Union station shortly before 9 a. m. reported that no passenger trains had left Washington since midnight, and with the snow continuing, prospects for getting any trains out was said to be poor. Three trains had arrived since midnight, two from New York, which were long overdue, and one express from Cincinnati.

Starting late yesterday afternoon, and still continuing early today, the snow covered the city to a depth of from one and a half to two feet. Street car service is practically suspended and early today there were prospects that all activity, governmental and otherwise, would be greatly curtailed. Pennsylvania avenue is strewn with the hulks of wrecked automobiles. The absence of wind prevented formation of drifts but the depth on the level was enough to strand practically all vehicles except those of the heavier type.

States comprising the middle Atlantic section are being buried under the heaviest snowfall since the long remembered blizzard of February, 1899. Lower New England also was hit.

### TONOPAH BELMONT IS MAINTAINING GREAT PRODUCTION RECORD

The Tonopah Belmont Development company continues to prosecute large development and the earnings continue in keeping with that of the last several months. During the week ending Friday, January 27, there was shipped 42 bars of bullion that had a value of \$38,301. This was the result of the clean-up of the mill for the first half of January, and while a somewhat heavier production was made last fall, the output is in keeping with the average bullion shipments that are invariably made during the winter months.

Operations are still being carried forward on seven different levels of the mine and a large amount of exploratory work is being performed which will insure ample tonnage for the continued operation of the big milling plant for a long period. The showing in the various workings is said to be up to full expectations, with prospects bright for an increased production being made during the coming summer.

Development performed during the week ending January 27, as furnished this paper officially, was as follows:

Five other companies other than the Treasure Hill have been incorporated, and the stock is remaining practically intact, which will permit of investors giving consideration to the corporations.

The coming spring promises to witness much activity in the Silverton district. The result of past development on the property of the Treasure Hill Mines company has demonstrated the richness of that section and there is every reason to believe that a number of producers will be developed in the near future.
